ISPO Award Recipients 2019.
ISPO Award.

Each year ISPO honors the sporting goods industry's most outstanding products with the ISPO Award. But ISPO itself is much more than an exhibition of products: It's the leading international platform for the entire sports business. ISPO is the meeting point for the decision makers and creative minds behind the brands.

The ISPO Award names the best products in the five segments: Snowsports, Outdoor, Health & Fitness, Urban and Teamsport. Each segment is divided into product-specific categories. A separate Eco Responsibility jury honors extraordinarily sustainable innovations and services.

Separately, objective international juries for each segment assess and judge the submissions.
Eco Responsibility.

Jury.
Sustainable on the highest level

Sustainability gains momentum since a few years. Therefore, the ISPO Award strategically integrates aspects of sustainability judged by experts of a separate Eco jury. In addition, the individual juries of each segment discuss the products in a separate process, evaluating the products’ innovative value, design, and functions.

Jury conclusion for 2019:

"After 2 days of evaluating the applications for the most innovative products in the sport industry, we could not see any outstanding sustainable product concepts. We do see that the sustainability achievements of the last years have raised the overall sustainability performance in the industry. For the next years, collaboration is needed by the most progressive, innovative and open-minded people. Who will be the next to step up and lead the way?"
Apparel.

Jury.
The essence of future sportswear

Today’s sports apparel is a complex matter, combining aspects of fashion, function and sustainability to create a garment best suited for the respective area of application. The procedure of judging apparel at the ISPO Award is therefore not an easy task. The judges, all of them professionals with a comprehensive insight and long experience in the business, have to consider a myriad of details to come to the right, and especially to a wise decision.

Therefore, the jury consists of journalists, fashion designers, trend forecasters, and fabric experts who take a closer look at all garments submitted for all ISPO Award categories. The next day, their decisions are presented to the hardware juries, and the apparel votes are finalized.
Snowsports.

Jury.
A future built tradition

Snow sports contribute to a large share of ISPO Munich, with skiing in all its facets being one of the strongest segments. This is also reflected by the ISPO Award submissions. It is amazing to see the unbroken development of this traditional segment as well as the innovations in snowboarding or cross-country skiing which often start new trends which turn into continuous movements. Avalanche safety, in particular, is a good example representing ongoing innovation throughout the years, thus inspiring the jury's work.
Mammut
SOTA HS Hooded Jacket

A fully featured 3L ski jacket with a 4-way super stretch laminated knit fabric with a 3D surface. The seamless surface design accommodates breathability and durability with open holes and 3D dense knit structures. Temperature regulation is enhanced by partially bonded Primaloft insulation in key zones. The special pattern construction and fabric achieve optimal freedom of movement and ergonomic fit.

Hall A3 / Booth 302
POC
POCito VPD air vest + TRAX POC edition

Child-specific, lightweight and breathable back protection that conforms to EN1621:2 Level 1 certification. The front chest pocket is designed to store a TRAX POC Edition device created to let you easily keep track of your child’s location and which can notify you in a range of potentially dangerous situations. The TRAX POC Edition has a set of exclusive features: SOS, inactivity report, ski maps, topographic maps, and activity data.

Hall B6 / Booth 414

Avalanche Airbag Backpacks

Black Diamond
JetForce PRO BT

The JetForce PRO BT Technology is an avalanche airbag system that is smaller and lighter than previously and features Bluetooth capabilities for easy updates. The pack is sleek, technical, and the entire system is modular, giving you the ability to attach a 10, 25, 35, or 25-liter splitboard booster pack making this airbag pack extremely versatile while providing more safety in the backcountry.

Hall A3 / Booth 402
Base Layer

**Craft**

CTM Baselayer Hood Long Sleeve

The seamlessly warp-knitted CTM Hood Long Sleeve features a unique 3D knit that offers unmatched freedom of movement, fit and comfort. The knit structure allows for advanced open mesh patterns, carefully placed for breathability where needed the most. An integrated facemask with breathing holes ensures maximum feel and performance in cold conditions.

Hall B3 / Booth 402

Gloves & Mittens

**Auclair Sports**

Race Fusion Glove

The Race Fusion glove is a high-performance race glove made of durable yet soft full-grain goat leather. The main characteristic is its external, articulated shell using D3O Impact Technology for premium protection. This particular configuration offers race-worthy protection in a more comfortable and ergonomic glove.

Hall B3 / Booth 510
Gloves & Mittens

**Black Diamond**
**Solano Glove**

This glove with 100% waterproof and breathable GORE-TEX® insert and Gore Warm technology offers three heat levels with LED button control and two different heat circulation modes. The rechargeable lithium-ion batteries are stored in a waterproof zippered battery compartment. The Solano is available as a finger glove and a mitten version.

Hall A3 / Booth 402

---

Helmets

**HEAD**
**RADAR**

The RADAR combines the benefits of wearing a goggle with those of having a visor helmet. As it is an entirely new approach in regard to construction and design, it is also for people who usually don't do visors. It provides an unrestricted field of vision and perfectly protects against wind and water. Its double-lens visor can be exchanged within seconds. The patent-pending Sphere Fit system assures a perfect fit.

**Teamsport  Health & Fitness  Urban  Outdoor  Snowsports  Apparel  Eco Responsibility**

---

**ODLO**

*I-Thermic*

I-Thermic is a fully knitted, intelligent thermoregulating performance midlayer. The garment leverages MAS’ patent-pending active heating technology Phoenix and is powered by CLIM8’s intelligent module and software, which regulates temperature fluctuations according to individual activity levels and temperature conditions.

Hall A2 Booth 30C

---

**VAUDE**

*Larice LesSeam Jacket*

The Larice LesSeam Jacket was made with a circular knit manufacturing process that reduces the amount of remnant materials made from pattern piece cutting. This conserves resources and provides incredible comfort due to a minimum of seams. A variety of material structures was used at different body parts to ensure optimum temperature regulation. PrimaLoft Sil. I. Eco is used at the front for warmth.

Hall A4 / Booth 20 + Hall A1 / Booth 406
HELLY HANSEN
W Whitewall Lifaloft™ Jacket

The women’s Whitewall Lifaloft™ jacket features a longer silhouette, and double needle embossed stitching. It has vast pocket space to accommodate backcountry safety equipment, hi-vis detailing for safety, and the Life Pocket™ to keep user’s phone batteries alive for longer. The jacket is extra warm without any added bulk, thanks to the 80g Lifaloft™ insulation by Primaloft.

Hall A1 / Booth 206

ROXY
PREMIERE SNOW JACKET FEAT. WARMLINK

Engineered to battle the cold, this season’s Roxy Premiere Collection introduces the Warmlink Technology to make even the harshest conditions a day at the beach. Internal heating panels keep the warmth in and the cold out, while sleek, sophisticated styling ensure that you’ll feel and look good from the top of the hill to the bottom.

roxy.com
The electronic HYDRO_BOT membrane actively pumps moisture from inside the jacket to the outside using electro-osmosis. This enhances the comfort and performance levels by protecting the skier from the dreaded, post-activity chill caused by trapped moisture. At up to ten times more efficient at removing unwanted moisture than conventional membranes, HYDRO_BOT is the only technology that can match the sweat rates of the human body.

Hall B1 / Booth 302
Mid Layer

**Peak Performance**

*Argon*

A sustainable, technical liner jacket made from recycled fabric with Thermore Eco Down synthetic filling and C0 DWR. Using an innovative production process, it features a unique quilt pattern, with woven vertical and horizontal channels for a sleek look. Avoiding stitch lines, the jacket has fewer cold spots and is more wind-resistant.

Hall B1 / Booth 304

---

Mid Layer Touring Suit

**TERNUA**

*BLACKCOMB SKI SUIT*

Very technical ski touring suit developed with athletes and developed for high-performance ski touring. Excellent balance of low weight, breathability, and warmth. Made with dryshell active flex fabric, a blend of 65% recycled nylon coming from recycling discarded nets and 35% of Elastane. Two chest pockets for skins and two zippered inner pockets for avalanche transceiver and other important things.

Hall A3 / Booth 506
The Blackyak Kostroma is the multi-use jacket for the 21st century. It features a weather shell constructed from GORE-TEX® INFINIUM® for protection and an integrated removable inner jacket constructed using YAKLOFT™ for insulation and YAK TruFlow™ air-permeable textiles.

Rottefella MOVE Switch Kit

When cross-country skiing, good grip, and glide are absolutely essential, Rottefella MOVE allows you to “shift gears” without taking off your skis. All you need to do is twist the MOVE™ Switch for better grip and better glide. With the new adaptor-plates, you can mount Rottefella MOVE on almost every ski.
**Goldwin**

G-Fides Jacket

The G-Fides jacket is a high-loft down jacket using GORE-TEX® 2L to provide excellent waterproof. 80g/m2 of recycled down is inserted with the original shaped baffle structure applied on the back to maximize warmth. Besides its technical features, unique detailed designs such as hood that wraps the collar and iconic designed front flap are applied.

Hall A1 / Booth 416

---

**Spyder**

Eiger GTX® Shell Jacket

Developed with pros like Chris Davenport and Owen Leeper, the new Eiger GTX® shell jacket is the ultimate fusion of style and performance. Main features: Engineered Polyester 3L with GORE-TEX® Laminate and DWR shell fabric, integrated four-way stretch panels for reach and full range of movement, underarm ventilation system, helmet compatible and adjustable fixed hood, removable powder skirt, storage management system with large pockets.

Hall B2 / Booth 202
Functionality meets style – the 3L GORE-TEX® Spyder Nordwand GTX® Shell Pant was developed with pros like Chris Davenport and Owen Leeper and comes with everything freeskiers expect from a high-performance pant: excellent weather protection and breathability, articulated knee construction, integrated stretch panels for full range of movement, internal and external thigh ventilation system.

**Spyder**
**Nordwand GTX® Shell Pant**

Building on the now widely accepted Responsible Down Standard platform, TrackMyDown.com is Allied’s next step in down industry traceability, sustainability, and education. TrackMyDown.com provides the ability for consumers to trace the down in their garment back to its source and provides the most up-to-date care information, all scannable at retail on the hangtag.

Ski Alpine – All-Mountain Skis

**DENERIAZ**
**DUAL’D**

Handmade all-mountain skis innovative for two reasons: First, because of the general concept of construction with balsa core and two lateral beams that work like a catamaran for the best skiing experience. Secondly, the asymmetrical structure of walnut and ash wood longitudinal beams, which adapt perfectly to each side and are ideal for either powder or piste, depending on the side they are skied on (left/right ski).

Hall B1 / Booth 218

Ski Alpine – Freeride Skis

**RENEWN**
**Citadel**

A full-carbon ski incorporating a non-newtonian material inside that reduces chatter and vibrations the harder and faster you ski. The Citadel represents a major refinement in this technology (non-newtonian material) and the most stable full-carbon ski ever. A ski light enough (~1,650g/ski) for the backcountry, yet still performing superbly on the slopes.

renoun.com
Ski Alpine – Ski Boots

**Nordica**

*Speedmachine J 3 Plus (GW)*

The Speedmachine J 3 Plus is the first adjustable junior ski boot. Nordica’s Infrared Technology adjusts the shell, the warm, thermoformable liner and all modular components to ensure a perfect fit. The new Weight Adjuster Button adjusts the flex on three different levels according to the different physical structures of children of the same age.

Hall B5 / Booth 340

---

Ski Touring

**G3**

*MINIMIST*

The MINIMIST skins achieve an ultralight feel by using high-performance textiles from other demanding sports applications, resulting in climbing skins that exceed the highest expectations for features and performance. MINIMIST skins are up to 30% lighter than its competition, and they pack small enough to fit into your jacket pocket. A carbon fiber insert at the tip of each skin creates a rigid platform that prevents snow creep.

Hall A3 / Booth 312
Ski Touring Skis

G3 FINDr

The FINDr series is uncompromising in performance and versatility in all conditions with a weight and set of features ski mountaineers dream of. New to the FINDr are magnetic contact points making boot pack transitions quick and eliminating the need for a strap when shouldering. As always, the FINDr has a full-carbon construction and polyurethane sidewalls for best-in-class dampness.

Hall A3 / Booth 312

Fischer

Outdoor.
Urban.
Jury.
Aiming high together

There aren't many segments as versatile and multi-faceted as the Outdoor segment. It embraces all products required for mountaineering, hiking, camping, trekking, and other outdoor activities. Safety and functionalities play a particularly central role. They are not only responsible for pleasure or pain, but they can also decide on well-being and survival in case of an emergency. Accordingly, the jury comprising athletes, extreme mountaineers, journalists, retailers, and even consumers is very rigorous.

Our everyday playgrounds

More than half of the world's population is living and working in urban areas, a fact that emphasizes the importance of urban sports for people's lives. From traditional street sports like skateboarding to inherent urban movements such as parkour or less known yet uprising disciplines like sign spinning: Our cities are huge, multi-faceted playgrounds and the ideal breeding ground for new activities.
Grüezi bag
Biopod DownWool Nature

Back to nature: A sleeping bag made from 100% natural materials – from the packaging down to the last button: You will be amazed by the sleeping quality and the sense of well-being in this sleeping bag. For extra comfort, the sleeping bag is also adjustable in width. The insulation material is Grüezi Bag’s proven DownWool filling.

**Vertical-Life**

Vertical-Life

**Training Log**

Training Log is a feature of the Vertical-Life platform. It connects climbers, professional coaches, and climbing gyms. Climbers can follow training plans in the app, designed by professional trainers and tailored to their individual fitness level and goals thanks to smart algorithms. The proposed workouts are based on the routes and boulders in climbing gyms that are linked to the app.

Hall A3 / Booth 430
**Marmot**  
**West Rib Parka**

All necessary features for a protective warm or final outer layer are combined in this parka. The fit and features allow the climber to maintain focus on the route, multiple pockets outside and mesh stash pockets inside cover all storage requirements. Protected by new WarmCube technology, an additional layer of synthetic insulation and Pertex Quantum with Diamond Fuse, this parka sheds bad weather and protects against cold.

Hall A2 / Booth 302

---

**ESKA**  
**ARKTIS GTX®**

The inner glove has a GORE-TEX® insert, with a special fixation of the insert guaranteeing maximum grip. The digital grip leather on the palm provides maximum dexterity. For bad weather conditions, extend the cuff and close it with the cord stopper. SEQRID saves the user’s medical data and emergency contacts.

Hall B3 / Booth 204
Outdoor Research
BitterBlaze Gloves

BitterBlaze gloves deliver dexterity, durability, and warmth for alpine adventures. They use the waterproof trustworthiness of GORE-TEX®, the resilience of Pittards Oiltac goat leather, and the revolutionary warmth of Aerogel insulation used in NASA space travel. Customized Aerogel inserts reduce heat loss from freezing cold elements, allowing for total focus on the task at hand.

Hall B4 / Booth 406

QOOL
QOOL Box

The QOOL Box achieves outstanding insulation performance with aerospace technology. It has vacuum insulation panels in all walls, lid, and floor. The QOOL Temperature Elements are available in five different temperature ranges from -25°C to +25°C. Combining the QOOL Box with the QOOL Temperature Elements keeps the temperature constant for many days – without external power supply, regardless of the outside temperature.

Hall A4 / Booth 215
Hybrid Outer Layer

**Blackyak**

**Sindhi**

The Sindhi vest is an exclusive female design and the little sister to the Mocho style. It combines the use of highly breathable TruFlow textiles and down for the highest level of comfort and moisture transfer. The down chambers are formed using a thermal process to reflect the Yak design lines. Should the weather turn bad, the Sindhi has a hidden pop-out water resistant and windproof jacket secreted away in the low-profile waist.

**Hall B1 / Booth 318**

Mid Layer

**BERG Outdoor**

**GERES ZERO GRAVITY**

Insulated packable jacket made of second-grade parachute fabric, not suitable for the parachute industry, but still maintaining all relevant features such as light resistance and water repellency. The water-repellent Primaloft Gold Insulation 750 Down Blend is treated with environmentally safe techniques. Made in Portugal, with recycled zips, and with a weight of 228g, this is an extra lightweight product.

bergoutdoor.com
ICE ROCK
Crampons 'Cougar'

The Cougar has ten titanium points for a solid hold on any terrain. The platform is made of carbon fiber reinforced polymer and performs an anti-snowballing function. Patented Ti and composite integration. The binding is optimized for all ski/alpinist boots with welts. Size adjusting linking system contains stiff bar and Dyneema strap. The latter reduces the weight and allows the crampons to be folded for compact packability.

BERG OUTDOOR
SORDO

This 100% biodegradable boot represents the next big step in sustainability: Under favorable conditions, it is decomposed after six months. So if the owner is ready to say goodbye after long years of companionship, he will know that the boot will come to an end in a completely sustainable way. Manufactured in Portugal, all materials (oak leather bionature, Burel and an Apinate outsole) have been selected to ensure full biodegradability.

**DESCENTE ALLTERRAIN**

MIZUSAWA DOWN JACKET “VARIANT”

Latest generation Mizusawa down jacket, extremely waterproof thanks to the new Cebonner® Horns Nylon fabric with natural, cotton-like feel, non-padded thermal bonding and seam tape sealing to ensure a moisture-managed environment. A central dual zip and pit zips form the classic ventilation system. The stored hood is quickly and easily opened with the QuickBurst zipper in the collar.

Health & Fitness. Teamsport.

Jury.
Health as a lifestyle

Fitness, health, and well-being are the most frequent answers when people are asked about their motivation for getting involved in sports. The Health & Fitness segment represents an entire industry revolving around this athletic lifestyle. It comes as no surprise that the segment has since shaped the ISPO Award. The current award winners prove that the progressive development of the segment is alive, and they also offer a good sneak peek into the future of the sporting goods market.

Team sports as an integral part of our culture and society

Early in life, team sports provide kids with important lessons on personal values and can be essential for their development in the social realm, but they are a great way for young and old alike to exercise and socialize at the same time. As leading team sports like soccer undergo interesting developments, new disciplines keep making headlines season after season.
Life Fitness
PLATINUM CLUB SERIES TREADMILL

The Platinum Club Series Treadmill is a health club-quality treadmill. The 21-inch Discover SE3 HD console is just as impressive in size, with unique interactive courses. You can stream Netflix or Spotify. With the Apple GymKit integration, you can sync your Apple Watch. The treadmill and your watch share data like heart rate, distance, speed, and incline, so what you see on the machine’s console is what is recorded on your watch.

Inspired by the unforgiving Nordic winters, the SubZ Sweater allows you to keep on running, even when the mercury collapses. This cold-weather running sweater features lightweight, heat-bonded padding at the front, brushed jersey fabric and a chimney collar for extra warmth and protection during winter workouts. In addition, the seamlessly knit sleeves and back provide exceptional comfort and fit.

The new SphereWind G2 adds ThermoSyphon technology to the award-winning jacket. The ergonomics of the jacket were improved with Preset Running Sleeves, Formed Sleeve Cuffs and the elimination of underarm seams. A scarab folding system allows the jacket to be worn comfortably around the waist. Weather-protected air outlets allow for climate control when the jacket is worn.

ASB GlassFloor

ASB MultiSport

The MultiSport floor is an industry innovation in the field of dynamic sports floors. Under the GlassFloor there are LED strips that light up through the glass to indicate the desired play lines for each desired type of sport on the surface, avoiding confusing line transitions. The individual lines of each sport are independently illuminated by a touch screen according to the sport desired.
