## WHAT KIND OF WORLD DO YOU WANT TO LIVE IN? **IT'S IN YOUR HANDS!**

The textile industry generates more harmful CO<sub>2</sub> than the entire worldwide ship and air traffic - with devastating consequences: The global warming can melt billions of tons of glacial ice and sea levels rise massively. Clothing can already be produced in a climate-neutral manner - without any compromise on quality and performance. Sympatex focuses on recycling, elimination of pollutants and climate neutrality.

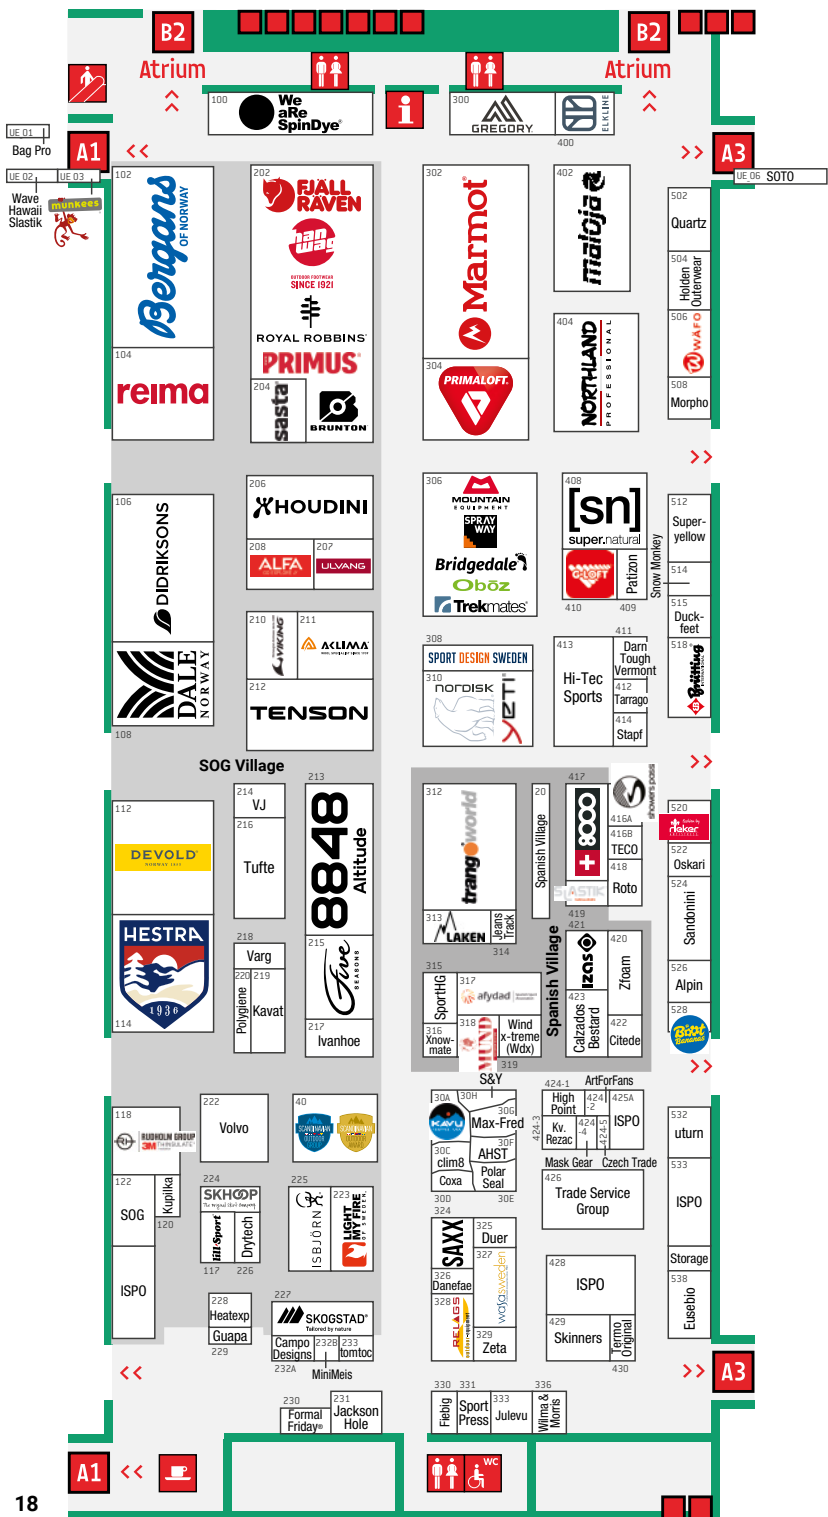

Make a conscious choice. Buy sustainable. And become part of a movement to change the textile world.

In a subsequent step, requirements regarding color arrangement, machine configuration and knitting technique are considered, resulting in a bitmap image which can be immediately processed in a design step with Stoll software tools. Finally, the software generates a knitting program and activates the machine. DITF and Stoll will introduce how the creation of such data in real time will enable entirely new perspectives in prototyping and individual servicing. <b>ISPO Textrends Conferences</b>	<b>C4</b> 20
