Lahnau, den 28.01.2021

NEW – Dr. Jacoby's original Magnesium MuscleFoam

For loose muscles.

The new Dr. Jacoby's original magnesium muscle foam relaxes and soothes through a mixture of magnesium aspartate and magnesium sulfate combined with an active heat complex. The beneficial effect occurs immediately. Through a light massage, on the affected areas, the magnesium is absorbed quickly and looses muscles. Dr. Jacoby's original magnesium muscle foam is ideal to use before and after sports. The new Dr. Jacoby's original magnesium muscle foam is available in the practical foam dispenser in the size 100 ml in brick-and-mortar stores as well as online retail.
