

TECNICA INTRODUCES THE NEW ARGOS GTX AFTER SKI BOOT FOR PROGRESSIVE SKIERS

THE ARGOS GTX IS A NEW-CONCEPT AFTER SKI BOOT WITH A UNIQUE MODERN LOOK, TARGETING YOUNG, PROGRESSIVE SKIERS AND OFFERING WARMTH, PROTECTION AND A NEW EASY STEP-IN FUNCTION. PERFECT AFTER A LONG SKI DAY.

An award-winning leader in the world of high-performance ski boots and trail footwear, it's only natural that Tecnica's next move would be an après boot, that draws inspiration from both. The new Argos GTX, available in both a men's and women's version, is an amalgamation of Tecnica heritage, modern style and technical construction, making it the ideal boot to grab whenever the barometer drops. A Gore-Tex Insulated Comfort membrane and a fleece lining provides waterproof, breathable warmth, while an oversized, winter compound Technigrip outsole and TPU laminated toe assure traction and durability throughout winter's worst weather.

A unique easy entry and exit cuff design along with a quick-lace system lets users wear these boots loose for slip-on convenience or laced up for secure protection. The Dual Lacing System offers two different modes of lacing. In fast mode, the lace operates up to the instep for quick lacing, while stretch mesh keeps the tongue in place, so that you can walk with the cuff open. In full mode, the boot is laced to the top of the cuff for a precise fit and protection during winter activities.

Whether it's après ski, the everyday trudge or a weekend snowshoeing, the Argos GTX keeps feet warm, protected and looking fresh.
