

REGULATE & PROTECT

#PlayfullySerious

BENEFITS

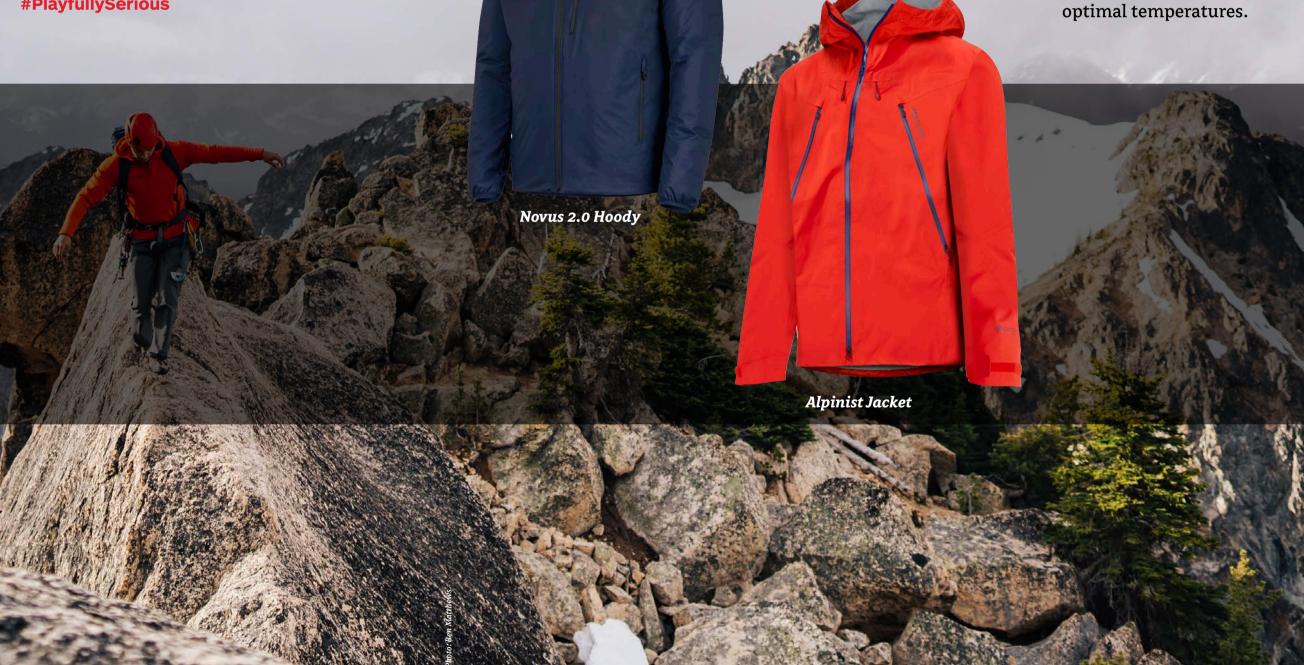

REGULATE ▼

- 1 Breathable
- 2 Durable Water Repellency
- 3 Protective Outer Layer
- 4 Durable Insulation Layer
- 5 Smooth Inner Lining

PROTECT ▼

- 1 Waterproof and Windproof Maintains waterproofness through multiple washes ans years of use
- 2 Dynamic Air-Permeability The more you move the more air is exchanged
- 3 Eco Friendly DWR

"Being outside" is freedom, fun, lifestyle and action. However, anyone who is outdoors cannot help but think about the principle of "layering". Marmot uses their expertise spanning more than 45 years to combine materials, colors and cuts in such a way that the right combination can be created for all weather conditions. The "R&P principle" is at the top of the list: Regulate and Protect. The outer layer to protect against the weather, while the layer below forms the insulation layer and ensures

by Roxanne Vogel

During the winter of 2019/2020, I embarked on an ambitious 30-day expedition to the interior of Antarctica. The goal was not only to complete the last of the Seven Summits, but also to research female physiological responses to prolonged polar expeditionary travel. From the start, the trip was beset with obstacles and setbacks, but in the end, all three of my objectives were accomplished:

Ski to the South Pole (12/28/19)
Summit Vinson Massif (1/6/20)
Summit Mt. Sidley (1/18/20)

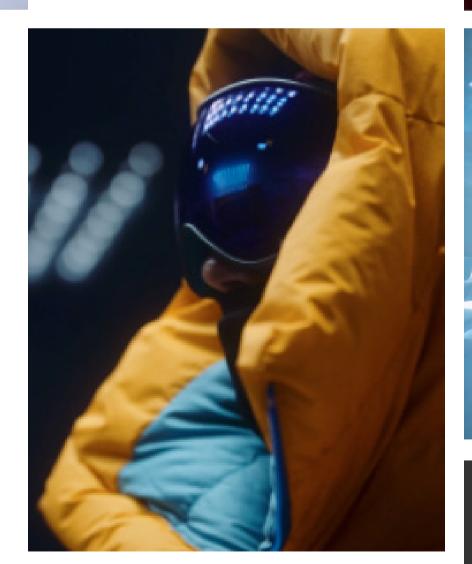

Mt Vinson, Antarctica

In retrospect, being nine months down the road from my longest-ever expedition, I realize now just how much I have learned from the experience. It was an adventure in every sense of the term. Survival instinct, mental toughness, and resilience all took center stage as I stretched my capacity to tolerate discomfort and uncertainty nearly to the limit.

— Roxy Vogel, Marmot Ambassador.

WARMCUBE™ 8000M SUIT

Some days, Antarctica could be downright lovely. I liked to imagine I was on an endless white sand beach, minus the ocean. One of the few places where you can get a sunburn and frostbite on consecutive days, I might as well have been on the moon.

Climbing Vinson marked the last of the Seven Summits for me. It signified the end of quest that

brought me to every continent and motivated me for the better part of a decade. In hindsight, I was incredibly fortunate to have made it to Antarctica before the pandemic struck and put everyone's lives on hold.

But the end it is not. I will continue to adventure,

But the end it is not. I will continue to adventure, discover, and dream big. Besides, the journey is far from over. I still have heaps of data to decipher and share with the world. Hopefully, it will add new insights into female physiology and adaptability to extreme environmental challenges. And, on a much broader level, I hope that someday my work will pave the way for a future generation of female scientists and explorers to follow their passion to the furthest reaches of the Earth.

Roxy Vogel, Marmot Ambassador.

Warm, Warmer, WARMCUBETM

The story of Marmot's award winning WarmCube™ technology started back in 2019 - and it became a success story. Since then, Marmot has won industry leading awards every year and the evolution of WarmCube™ infused products continues throughout our collections with a variety of clothing and sleeping bags".

The innovative 3D construction of our WarmCube™ technology fascinates through air channels between the cubes. These air channels fill up with warm air and thus build an additional layer of insulation. The cubes are filled with 800 fill-power down or synthetic featherless insulation, providing a WarmCube™ option for every climate.

FEATHERLESS HOODY ▼

When you're far above the treeline and have a ways to go before you reach your final destination, you need gear that's technical, tested, and protective. That's why you need the Men's & Wm's WarmCube™ Featherless Hoody on your back or in your pack. Innovative 3D WarmCube construction prevents 3M™ Thinsulate™ Featherless and PrimaLoft® Silver Hi-Loft insulation from being displaced, plus traps heat in the surrounding channels for maximum warmth. Pertex Quantum® fabric is layered on top to shield wind and improve its efficiency. If the gusts pick up, the fixed hood with an adjustable front opening, double cord lock at the hem, and internal elastic cuff gaskets block drafts and offer extra coverage. Keep alpine must-haves secure in this hoodie's zippered interior or extra-long hand pockets.

Environmental Impact

REPORT CARD

Marmot's goal is to build high performance products as sustainably as we can. We label each product with a rating based on our internal standards, comparing only within Marmot's own product line, so you can make informed choices about our gear.

Environmental Impact

REPORT CARD

from 100% recycled nylon, certified by the Global Recycled Standard.

Sustainability has always been a focus of Marmot's design and manufacturing. That continues in Fall 2021 as we carry forward the momentum of the offering-wide packaging program.

#BetterThanFound

Factory Welfare

Protecting and promoting the well-being of the people who make the products we sell is a core component of running a responsible business. We require all suppliers to adhere to our Code of Conduct and we physically audit their facilities annually.

Environmentally-Friendly Fabrics

Bluesign® is the leading standard for apparel that ensures the elimination of harmful substances and guarantees environmentally responsible and safe production of materials.

Recycled Materials

Industrial nylon waste is upcycled into new nylon yarn reducing the petroleum & energy necessary to create virgin yarn. 36% of Marmot's volume uses recycled, upcycled, and renewable materials.

Environmentally-Friendly DWR

Many of our shells now utilize PFC-free waterproofing treatment using natural materials with by-products that break down faster in the environment.

FREERIDER JACKET

The Men's Freerider Ski Jacket has your back as you're tearing it up on the mountains, bombing downhills, or making first tracks on groomed trails. Its 2-layer GORE-TEX® fabric, PFC-free Durable Water-Repellent finish, and 100% seam-taped construction keep you dry and prevent leaks.

Snow can't find its way into inner layers thanks to the helmet-compatible hood, fixed power skirt, and adjustable VELCRO® cuffs. Heat-releasing PitZips prevent overheating as your runs get intense. The zippered neck gusset and two-way center-front zipper make it easy to adjust your gear without opening the entire jacket. For safety on steep slopes, the RECCO® Avalanche Rescue Reflector bounces a signal back to rescuers.

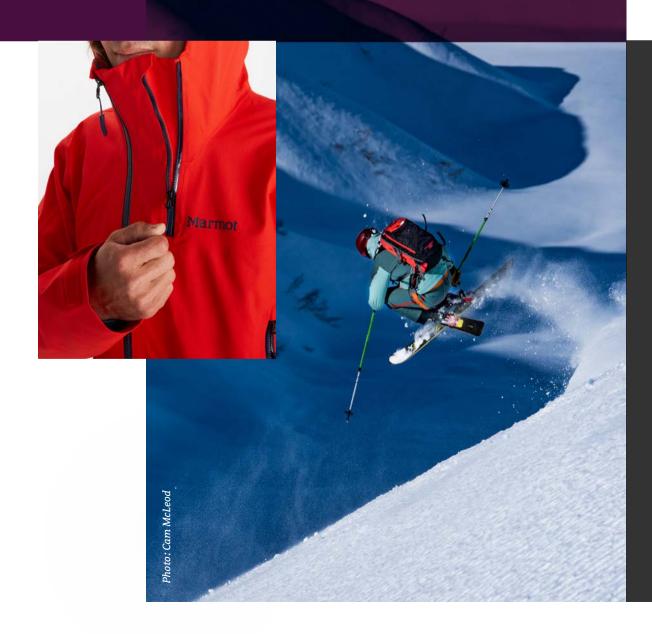

To all to G

MEN'S & WM'S HUNTLEY JACKET & BIB

The Men's & Wm's Huntley Jacket is designed for alpinists, mountain guides, and black-diamond shredders to brave the elements. Waterproof and breathable 3-layer GORE-TEX® technology and 100% seam taping keep you dry and prevent leaks. Large water-resistant chest pockets stow small gear. Articulated elbows make it easy to move when layered, and the two-way center front zipper prevents the shell from bunching while you're on the chairlift. The attached hood features an adjustable drawcord at the back that won't interfere with a helmet.

The durable Huntley Bib is ready for gritty hikes, alpine ascents, and everything in between. Paired with 100% seam taping, GORE-TEX® C-Knit™ fabric keeps you dry above tree line, plus offers a soft, quiet exterior. The stretch back panel and articulated knees increase mobility, while CORDURA® scuff guards resist abrasions against rock, ice, and dense foliage. Convenient features like adjustable suspenders, a drop seat, separating side zippers, and a thigh pocket let you focus on the adventure.

MEN'S COLORS

WM'S JM PRO JACKET & PANT

worries, just add the easy-to-layer Wm's JM
Pro Ski Jacket & Pant to your kit. Its 3-layer
GORE-TEX® fabric, 100% seam-taped
construction, and PFC-free Durable WaterRepellent keep you dry. Heat-releasing PitZips
improve airflow. The zip-off powder skirt and
VELCRO® cuffs prevent stealthy snow from
reaching inner layers. The helmet-compatible
hood stays in place even on aggressive
descents, while the RECCO® Avalanche Rescue
Reflector bounces a signal back to rescuers for
added safety on the mountain.

MEN'S & WM'S HYPE DOWN HOODY

Don't let a little chill keep you from the crag. The very packable Men's & Wm's Hype Down Hoody is the perfect layer to wear under a shell while you wait to belay. Its lightweight 800-fill-power down will keep you warm, while the windproof Pertex Quantum® fabric helps the insulation perform even better. Stash gear in the hand or interior mesh pockets. When the climb is done, this down jacket stuffs into its own pocket.

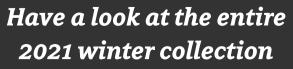

MEN'S & WM'S NOVUS 2.0 HOODY

Built for uphill talus hopping or long multi-pitch routes in dropping temps, the Men's & Wm's Novus 2.0 Hoody is back with better tech than ever. PrimaLoft® Silver Hi-Loft insulation offers warmth and wind resistance without the bulk in your pack. Its lightweight stretch fabric enables agile moves, while the AirExchange lining enhances breathability for increased comfort. If the winds pick up, the elastic binding ensures the hood stays put, plus the adjustable cord lock at the hem and wrist cuffs block drafts. Stow climbing gear in this hoodie's interior chest or zippered hand pockets.

OLDEN POLARTEC 1/2 ZIP

Your go-to pullover just got a serious upgrade with the Men's Olden Polartec® ½-Zip Fleece Jacket. Perfect for chilly 10Ks or as a midlayer for snowy pursuits, its breathable and moisture-wicking Polartec® Power Stretch fabric with 4-way stretch enhances mobility as you're testing your limits. Gusty day? The wind flap with a roll-over chin guard offers extra coverage. Flatlock seams provide chafe-free comfort, while thumbholes keep your hands warm and layering easy. Stow your keys or cards in the zippered chest pocket.
